SECTION ONE: DEFINING YOUR PROJECT

1.1 Detailed research question

How does the Moodle system help in the efficient running of the University?

1.2 Keywords

Education; Moodle; Visualization; Design; Uploading; Documents;

1.3 Project title

How internet affects Coventry Universities Online System.

1.4 Abstract

This report explores the ways in which the Moodle system is used in Coventry University by both staff and students. I explain what the system is, why it is used and why it is such a core feature of the University. I look at the key features of the system and how it currently impacts on the day to day running of courses. Feedback from various sources using questionnaires, interviews, social media and data logging is used. Strengths and weaknesses of the system are explored and how it has changed over the past years and also how it will continue to change and implications this will have in the future. I review the data from staff and students and look into the effect the system has on various aspects of their courses and the efficiency of the system. I also talk to ex students through social media and talk about my own personal experiences and how it has enhanced my student experience. I collate the data, summarise my findings and finish by exploring the future of Moodle and what this could mean for the University.

SECTION TWO: YOUR RESEARCH PLAN

2.1 Primary Research Plan

- 1) Use various ways to collect primary data from staff and students
- 2) Look at secondary data
- 3) Analyze Feedback
- 4) Identify Strengths and Weaknesses in the system at present
- 5) Summary of Findings

2.2 Secondary research sources (key texts for your literature review)

Cole, J. and Foster H. (2007) *Using Moodle: Teaching with the popular open course management system*

SECTION THREE: IMPACT AND PLANNING

3.1 Client, Audience and Motivation:

Both staff and students will benefit greatly from the findings in this project. This is because Moodle is the core of the academic system used here. Any research on what is currently used, what is working well and what could be done or added to further enhance it would benefit in many ways. Such as; clearer communication, better resources and easier access, which in turn allows for a more efficient running of the University. Not only will this report highlight the benefits of the system, it will also provide a broad analysis of it and how other organisations can benefit from the findings.

3.2 Evidence of project management

Keep records of supervisor meetings, create a Gantt chart showing certain targets and when I need to meet them, keep a diary log of my work, keep a log of time management and keep in dialogue with my supervisor.

Please upload your completed form to Moodle by the deadline of 23:55 pm on 10/11/2014

Please ensure you send a copy to your supervisor.

Thank you for completing this form
